

KLOVE is well known in the Des Moines Area for Christian listening. If it is replaced by LPFM, it will affect what our families are hearing on the radio. I believe that KLOVE is in the public interest because the music our children are listening to these days on regular FM is usually about sex, drugs or violence, therefore we need the inspirational and positive influence from KLOVE and other christian music channels to get our young generations back on track and heading true north with their values and morals.
